Cryopreservation using cryogenic liquefied nitrogen is an established and reliable practice in science, research, medicine, environmental research and engineering. The safe cooling down to -190°C in the gas phase as well as the inert atmosphere allow for optimal freezing and storage of valuable medical and biological samples and materials.

Cryotherm, a leading supplier of storage, transfer and transport systems, has been a renowned manufacturer of cryogenic technology products and services for more than 55 years.

BIOSAFE® by Cryotherm has long been synonymous with superior quality and safety. Experience, technology and our know-how make it easy for you to decide on BIOSAFE®. Advancing into the future with recent cutting-edge developments, we have expanded our BIOSAFE® line-up with new life science products.

Our BIOSAFE®-systems consist of:

- ▶ BIOSAFE® / VENUS cryogenic storage containers, made of stainless steel or aluminum for the storage of large, but also small sample quantities.
- ▶ BIOSAFE® smart, a level controller device and container monitoring system for reliable supply of cryogenic liquefied nitrogen
- ▶ BIOSAFE® VENUS – an aluminum container series for small to medium sample volumes.
- ▶ BIOSAFE® MARATHON – a dry shipping container for safe transport of your biological samples.
- ▶ BIOSAFE® GO is the practical and ergonomic workbench for the safe loading of your biological samples into ampoules, boxes, racks, etc.

The one-stop Biobank

55 YEARS Ice cold experience

For over 55 years we have been working closely with scientists and researchers.

On-site consultation

Our experts are looking forward to consult with you!

Excellence in Engineering

Your Turnkey Biobank: Everything in one full package!

Service / 24/7 hotline and maintenance

Always close to our customers.

4.0 Monitoring

Clever management of your entire biobank. Even from afar.

BIOSAFE® smart

The digital brain of your biobank.

Biobanking 4.0

100 % in control

Thanks to optional electromechanical locking, your samples are protected against access. Twofold access control via RFID transponder and PIN code. Logs all activities according to GMP FDA CRF 21 part 11.

Big Data

From monitoring to recording to evaluation of the sample cycle - Let data speak.

Touch Screen

Intuitive multifunctional 8.8" panel with colored touch display. Bright and functional.

Conversion Kit*

Your existing BIOSAFE® repository freezer can be updated with new BIOSAFE® smart. Item no. 78221956

* Cryotherm verifies feasibility.

Best durable

Protected by a sturdy glass panel, ideal for aseptic and medical environments.

Extensive special equipment

Various options for linking components such as gas bypass, UPS battery, lid lock, additional temperature sensors and much more.

Select your Software-Package

Config-Version
On-site BIOSAFE® monitoring via color display (included).

Info.View
On-site and remote monitoring of BIOSAFE® including secure data analysis and transfer, with the ability to connect up to 254 BIOSAFE® units in up to 10 cryobanks.
optional: Item no. 78216677

Info.Alarm
Includes all features of Smart + including Messenger function via encrypted SMS and / or eMail.
optional: Item no. 78216678

BIOSAFE® 120 - 220 - 420

Our secure BIOSAFE® Wide Neck Storage Vessel Series.

All Advantages at a Glance

Our BIOSAFE® systems 120 to 420 are optimised for maximum capacity with minimised external dimensions. The large, thermodynamically optimised, vacuum-insulated lid that comes with an attractive design makes it possible to access stored materials in just seconds.

Filling of samples takes place through the wide neck opening in the freely accessible storage compartment. The solid construction, made of polished, stainless steel, ensures maximum life time and a low evaporation rate. A combined vacuum closure and safety device for the vacuum chamber provides additional security.

BIOSAFE® 120 - 220 - 420

The practical working biorepository system.

All Advantages at a Glance

NEW
now available
for the
BIOSAFE® 120

Ahead of the market:
Our integrated BIOSAFE®
smart control
for level control and vessel
monitoring

Distinctive & sophisticated:
Ergonomic lifting and swivelling
mechanism / Low, user-friendly
vessel height

Double the safety!
Mechanically and
(optional) electronically
lockable lid

TOP accessibility to your
samples, ideal for
frequent usage

Well-thought-out:
Depending on the vessel size,
high nitrogen reserves below
the shelf floor will last several
days.

Optimised storage capacity
by utilising space-saving high
efficiency categorisation
systems

High storage capacity
for up to 23,100 samples,
2 ml vials

Low evaporation rates

Smooth surfaces,
that are **easy to disinfect**
- even on top of the lid.

BIOSAFE® 120 - 220 - 420

Ideal for routine work with biological-medical samples.

Our BIOSAFE® systems 500 to 2400 are optimised for maximum capacity with minimum consumption. In the range of 500 litres to 2400 litres and more, the containers can be easily loaded via the side-mounted vessel neck and the smooth-running carousel. Smooth-running castors ensure the mobility of our BIOSAFE® storage vessels and provide even more flexibility.

BIOSAFE® 500 - 800 - 1800 - 2400

The safe bank. The long-term storage BIOSAFE® series.

BIOSAFE® 500 - 800 - 1800 - 2400

Our Narrow Neck BIOSAFE® Stainless Steel Series.

All Advantages at a Glance

Zero-gravity lid technology

A convenient spring supported lid lets you open BIOSAFE® with one hand and zero effort.

Engineered for Excellence

Made in Germany to the highest standards for medical devices (MDD 93/42 EEC), BIOSAFE® features design and materials that are optimised for aseptic environments.

Double the safety!

Mechanically and (optional) electronically lockable lid.

Ahead of the market: Integrated BIOSAFE® smart-control

provides level control and vessel monitoring

Best in its class!

Store up to 120,000 2 ml samples in just one BIOSAFE® vessel. Unbeatable amount!

TOP-Handling

Smooth carousel for quick and safe usage.

Sophisticated ergonomics

Convenient steps, handles and a user-friendly low operating height ensure safe and comfortable handling.

More than just safe

Numerous options for redundant vessel monitoring for GMP-compliant applications.

The suitable inventory systems

Overview

Your needed Packaging

Our various Solutions

For your BIOSAFE® Repository Freezers

GAS PHASE: liquid under the platform; samples immersed in N₂ vapours (temperatures around -180°C)

LIQUID PHASE: Samples completely immersed in liquid nitrogen (temperatures around -190°C)

Possibility of both types of cryopreservation through probe length adaptation

BIOSAFE® storage system

Overview

All Advantages at a Glance

New High Efficiency racks

- ▶ High storage capacity with new High Efficiency system
- ▶ Safety fixation system
- ▶ Maximum protection for your samples
- ▶ Various heights for flexible use and compatibility with all biorepository freezers
- ▶ Variable arrangements for setting your own order system
- ▶ Low tare weight due to sturdy aluminium construction
- ▶ Transparency by means of sample management system

Functional Favorite

! for detailed information of BIOSAFE® smart system please take a look on page 8.

BIOSAFE® smart is an on-site vessel monitoring system with the following abilities:

- Level control and monitoring, automatic filling and temperature display
- Monitoring and evaluation of alarms and events
- Data analysis and transfer according to GMP FDA CRF 21 Part 11
- Double access control via RFID transponder and PIN code
- Temperature monitoring with up to 3 temperature sensors
- Visual and audible alarm on the display
- Forwarding of alarms and temperature
- Other optional equipment: battery backup, warm gas by-pass, software with alarms and messenger electronic lid locking device

Tracking your Cryogenic Samples

Example of 2D Scanner

Not included in delivery.

BIOSAFE® iTrack is a central database that can manage your stored samples based on their storage position. It can easily be adapted to the individual needs of your biobank. The necessary basic information and additional user defined information is linked to each sample. This information may be different data templates, logistics information or process data.

All Advantages at a Glance

- User friendly storage management
- FDA 21 CFR Part 11 compliance
- Sample based temperature logging
- Highest degree of data encryption for your sensitive data
- Developed, tested and documented according to ISO 13485, ISO 62304, IEC 62366
- User-defined storage structures/layouts
- Comprehensive storage level access rights
- Barcode scanner and RFID support
- User-defined sample data templates
- Visualisation of storage locations and containers
- Single/Multiple sample check in/out
- Single/Multiple sample data modification
- Comprehensive reporting PDF
- Comprehensive data Exports PDF/CSV
- Multiple IDs possible
- Windows based system
- Multi-site/multi database support
- 2D Flatbed scanner support
- Lab OS Web Access /Customer requests
- Electronic signatures ("A face four eyes check" feature)

BIOSAFE® GO

Ideal for safe handling of your samples.

NEW

All Advantages at a Glance

BIOSAFE® GO is the practical and ergonomic workbench for the safe further processing of your biological samples in ampoules, boxes, racks, etc. Optimal for the the transport of large sample volumes from one container to another other container in a cryobank, e.g. relocation.

- ▶ Sample handling and transport of two horizontal towers in cryogenic N2 gas phase
- ▶ Vacuum insulated storage container mounted on a stainless steel transport cart
- ▶ Two separately opening lid halves
- ▶ Additional opening with plug for level measurement
- ▶ Temperature booster made of aluminum for low temperatures in the working chamber
- ▶ Movable sample handling table
- ▶ LN2 filling device with ball valve and 1.5 m insulated filling hose connection
- ▶ Two accesses for T-probes and mounting options for temperature logger

Technical Data

All Advantages at a Glance

The safe aluminum storage vessel.
Ideal for biological-medical samples..

- ▶ For up to 6,000 samples 2 ml vials in gas or liquid phase
- ▶ Storage capacity for straws on request
- ▶ Storage capacity for bags on request

Table for dimensions

Technical Data

BIOSAFE® VENUS		150	180
Neck diameter	[mm]	216	216
Weight, empty (as delivered, with rack system and BIOSAFE® smart electronics)	[kg]	96	105
Weight, full (in real operation with LIN, max.)	[kg]	192	245
Total height	[mm]	A 1.100	1.215
Height of vessel	[mm]	B 950	1.065
Height of roller base	[mm]	C 140	140
Diameter, outside	[mm]	E 678	678
Depth max.	[mm]	F 840	840
Width max.	[mm]	D 820	820
Daily evaporation	[%/day]*	0,79	0,54
Static holding time	[days]*	148	181
Static holding time	[days]*	13	13

*) The daily evaporation rate and the static holding time were determined at 20 degrees Celsius, 1013 hectopascal, with the vessel standing still, lid closed and without accessories. These are nominal values that may change depending on the use and age of the container.

Smart-rack system for a comfortable and safe acces to your samples

Individual numbering for clear placement

item No. 77031452

Roller base

Ø 687 mm (interior), height 140 mm
item no. 78217560

Gas phase storage

Your samples are stored in the gas phase, without contact to liquid nitrogen. The usable levels secure the storage in gas phase.

Liquid phase storage

Your samples are stored up to 100% in the liquid phase at temperatures down to -196°C.

Functional Favorite – BIOSAFE® smart for VENUS

BIOSAFE® smart is an on-site vessel monitoring system with the following abilities:

- Level control and monitoring, automatic filling and temperature display
- Monitoring and evaluation of alarms and events
- Data analysis and transfer according to GMP FDA CRF 21 Part 11
- Double access control via RFID transponder and PIN code
- Temperature monitoring with up to 3 temperature sensors
- Visual and audible alarm on the display
- Forwarding of alarms and temperature
- Other optional equipment: battery backup, warm gas by-pass, software with alarms and messenger

! for detailed information of BIOSAFE® smart system please take a look on page 8.

All from one source

BIOSAFE® VENUS

With the BIOSAFE® smart for the Venus series, an automatic refill system can be connected conveniently, easily and safely.

For the nitrogen supply, the APOLLO® series is available.

! Further information concerning APOLLO® series from page 36.

Item Numbers

! Our BIOSAFE® VENUS vessels are available in capacities from 150 to nearly 180 litres.

For your BIOSAFE® VENUS we supply various equipment options and extensive accessories.

All Advantages at a Glance

Best in it's class!

Evaporation rate for e.g. APOLLO® 200: Only 0.6% per day!

A ball valve for comfortable view: „Open or close“

Safety measures at eye level

Ideal operating height and user-friendly fittings (ball valves)

High stability for secure and smooth transport

Time savings through increased uptime for your application

Robust protective frame for safe transport

Higher service life with the following advantages: Savings in transport and handling costs

High quality design made of corrosion-resistant stainless steel

Low maintenance

Large, stable and smooth-running wheels (Ø 125-160 mm) without sharp edges

Great mobility through compact design

Long-term vacuum protection through high-quality adsorption and getter materials

Including Accessories

Gloves

Item No.: 07794111

Safety glasses with side protection

Item No.: 07794189

Transfer hose 1,5 m

Item No.: 79229957

Phase separator G 3/8" complete

Item No.: 79404217

(everything included)

Applications

APOLLO®

compatible

- ▶ Analysers
- ▶ Cryogenic mills
- ▶ Cryogenic saunas
- ▶ Freezers
- ▶ Biobanks
- ▶ BIOSAFE®

...

Essential Construction Elements and Equipment

- | | |

| 10 Pressure regulator (opt.) | 21 Liquid nitrogen |
| 11 Pressure build-up regulator (opt.) | |

NEW

Standard equipment

- Integrated safety device on the vessel neck
- Vacuum seal and safety device
- Smooth-running castors and transport protection frame
- Level and pressure gauge
- EK lift with exhaust and overflow valve
- Integrated pressure build-up
- Filling hose (1.5 m) with phase separator
- Transport plug **1** with safety
- Cold protection gloves **2** and safety glasses **3** with side protection

for a fixed connection of an APOLLO® urgently required!

! Our APOLLO® -Series is available with a capacity of 50 to 350 litres
