

Our **HandHeld** particle counters are feature-rich instruments that are ideal for spot-checking inside of your critical environments or indoor air quality applications.

The ergonomically designed and lightweight HandHeld particle counters feature 0.2, 0.3, and 0.5 μm sensitivities. This flexible device can be used as a mobile particle monitor or become part of a larger facility monitoring and management system.

Lighthouse HandHeld particle counters can display cumulative and differential particle count and temperature/relative humidity data. The Handheld can hold up to 3,000 records of particle data and store up to 50 recipes for sampling and reports. Removable batteries and an optional charger maximize uptime.
